CARP  **BAITS**

HAPPY CARP

MISAL LAORANGE

CARP BAIT'S

Tousled hair, distinguished beard, carps tattoos on his shoulders, and a constant readiness for action. Fishing is his passion, love and profession. It is his way of life. As a young child Mišel Zadravec was filled with enthusiasm for sinking the hook by his uncle. Actually, the uncle cut a stick in the shrubs and tied a thread and a grasshopper to the hook to keep Mišel quiet. Joking aside. Let's not waste words on the equipment from the half-past history. Everything was home-made, but luckily fish were abundant in those days, and so it was not hard to catch one using a simple kit. Mišel got his first real pole-and-line from his father. To fish with the pole from Germany was a joy, and fishing got under his skin.

After he finished his schooling an idea appeared. What if he would open a fishing shop in his hometown? With his Mišel Zadravec dedicated himself to fishing forever. During the maelstrom of war for independence in 1991 Mišel and his friend made first home-made boilies. A vast amount of hard work for 3 kilograms of baits! The weapon for a march on local lakes was made. The results were fantastic: there was not a single lake where they would not catch a capital carp or amur.

Soon he found a new challenge: he went across the border. Since Hungary was the nearest neighbouring country, it was his first choice. And the adventures in the foreign waters began. When Mišel Zadravec put his baits on the thread instead of the hook, local fishermen gave him weird looks. And they were even more surprised when he released the caught fish back into the water. He always took his friends along, and he still does.

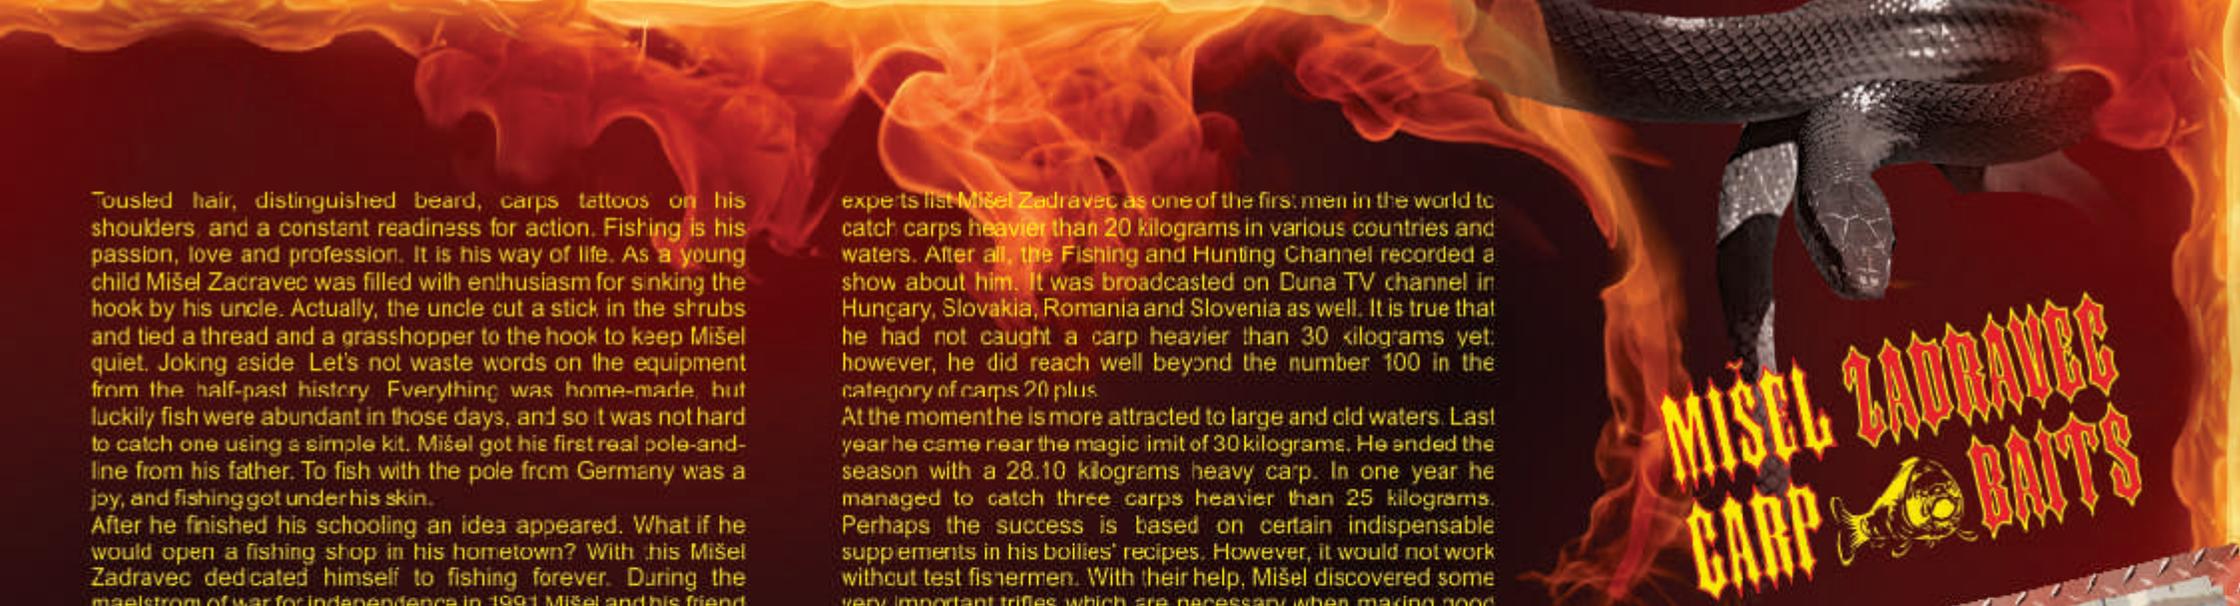

Hungary was the first of at least 10 countries in which Mišel Zadravec tried his luck. In five countries he caught carps heavier than 20 kilograms. In two countries he ran short for a couple of grams. He is one of ten European fishermen who caught 20 kilograms or heavier carps most often. Actually, the

experts list Mišel Zadravec as one of the first men in the world to catch carps heavier than 20 kilograms in various countries and waters. After all, the Fishing and Hunting Channel recorded a show about him. It was broadcasted on Duna TV channel in Hungary, Slovakia, Romania and Slovenia as well. It is true that he had not caught a carp heavier than 30 kilograms yet; however, he did reach well beyond the number 100 in the category of carps 20 plus.

At the moment he is more attracted to large and old waters. Last year he came near the magic limit of 30 kilograms. He ended the season with a 28.10 kilograms heavy carp. In one year he managed to catch three carps heavier than 25 kilograms. Perhaps the success is based on certain indispensable supplements in his boilies' recipes. However, it would not work without test fishermen. With their help, Mišel discovered some very important trifles which are necessary when making good bait. He is only a step away from the perfect success. In 2012 he exports baits to Italy, Germany, Slovakia, Czech Republic, Romania, Hungary and Croatia. He is still making arrangements with some other countries.

Up to now, Mišel Zadravec met many new people that were a motivation for his way to the top. The greatest source of motivation and energy is of course his young family, who always stands beside him. What is more, Mišel Zadravec's wife and two sons are closely connected to the thing he likes most.

With many years of experience and tests we developed a combination of components, which like a magret, they are unable to resist the temptation.

Our product we can say unique in the world, because we have worked out own recipe for all series, own basemix

very important aspect they are made by adding fresh eggs and very important criteria they are made with simmering and not with cooking. With this technique their high protein, vitamins, minerals and aroma content. Because the boilies are quickly and easily digested, enhance the feeling of hunger, and encourage the carps. Thanks our constant development, year by year we can be a step in front of the carps, in order to ensure a successful catching.

I wish you a successful fishing Misel Zadavec"

Crazy Fish:

After many years of testing we managed to find the perfect harmony of the fish meals. This product does not contain aromas, the flavour was given by five types of fish meals. It contains. The rest of the components were selected with special attention, in order to keep the correct proportions between vegetal proteins and amino acids. As a result we got a high protein content material, we suggest for spring fishings, when the carps need a lot of protein, but of course use all year round.

Fish Steak:

In this product the high quality animal proteins. The rest of the components were selected with a special attention, in order to keep the correct proportions between vegetal proteins and amino acids as a result we got a high protein content material. This mixture of typical smelly odor we cannot define, therefore we give it this fantasy name we suggest for summer, hot water. After many years of using we observed that this product is preferred by the big fishes, don't be afraid to leave on the hook for up to 48 hours. Over the past few years among the big carp anglers it is not missing from their repertoire during an extended fishing trip.

Squid Magic:

The name also refers to a real squid boilies. Here we select the added flours to form a perfect mixture with the squid flour. In order to be more attractive we added also a first quality squid aroma, this enables you to catch big carps in cold and muddy water too. Thanks to the mixture of flour it has a high protein, amino acids and vitamin content.

Magic Spice:

Before the boilies birth, the old carp anglers already used successfully the spices in their baits. Therefore keeping this tradition we created a mixture using home spices. The spices and everyday flours we smuggle in the mixture. Thanks for we got an exceptional product, we can use successfully on full fishing season, but we specially in the summer and autumn waters and in front times also. This is an essential component of a real fishing trip.

Formula X:

This boilies was created from the Cat fish and carp progeniture's nutrient components, mixed with animal flours. With this combination we got a product selected by the carps. It's a special big carp boilies and we can leave on the hook for a longer time, waiting for. Thanks to its slight smell over 20 ° C water. It has a high protein, amino acids and vitamin content.

Super Spice:

This product has the Magic Spice boilies. In this boilies mix we added some exotic spice, and the result in this case was a more intense bait. Nothing better demonstrates the success of this boilies, on the first fishing trip we caught two 30+ carps, in very intensively fished waters. In this mixture the vegetable proteins. It does not contain aromas, their

taste are given from the flours, so we specially in tepid waters.

Hot Spice:

This is the sweet spiced boilies from our spiced boilies family, it has a sweet spicy fragrance and taste. It does not contain added aromas, and in this mixture the vegetable proteins. For this sweet-spicy character we use throughout the year.

Hot Spice:

The name also refers to a very burning ball, it does not contain aromas, because the spices it has a very distinctive flavor, the intensity we can use successfully in cold and moody waters, but it can cause pleasant surprises in the warm of the summer, it can arouse the interest of the bigger fishes sooner. This product contains in a higher proportion animal proteins, it can be the secret of successful catching with this ball, since for fishes it is like for us a good spicy steak.

Indian Liver:

Many times we have no idea, how we can start fishing on an unknown water, with a spicy or a stinky boilies. To eliminate this dilemma we created this product. We use aromas, the unique flavor coming from the mixture, what contains exotic and home spices and fermented and freeze-dried liver powder. The content of the animal protein in this product is high, and in sufficient quantities contains vitamins, amino acids and plant proteins too. We use specially in the summer and front times.

Super Halibut:

Each carp angler needs the success of the red and black pellets. This bait is included in, upgraded by boilies good properties, containing progeniture nutrients, animal and plant proteins, amino acids and vitamins. In the liquid components in bigger part we mixed halibut oil, so we use in hot waters like Rio Ebro, where we have achieved great results with it.

MISL ZADRAVEC CARP BAIT'S COMPETITION

Like all our boilies this bait we produce also with simmering, to keep their aroma and freshness. Our first aspect was to create a high aromas combination, what we mixed with a high concentration fish flour. With this series we realised a bait what is very successful troughout the year mainly in thath periods when the carps are inactive. We have achieved significant results before and after running periods, when the simple aromas not working. Ther are ailable in folwing versions:

COMPETITION BOILIES - 1 kg

STRAWBERRY FISH	MZB0014	20 mm
GRAPES FISH	MZB0015	20 mm
MONSTER CRAB FISH	MZB0016	20 mm
LIVER FISH	MZB0017	20 mm

Strawberry - fish:

We started with this version, Since then, the production is continuous thanks for it succes. The key of succes is, it contain a minimum quantity of strawberry aroma, for this we can fish efficiently in summer when the carps don't like the intense aromas. We in non-moody waters.

Grapes - fish:

After a long searching we found the producer of this aroma, but it was worth while because it's a very successful product. it contains also a minimum quantity of aroma.

We in non-moody waters.

Monster Crab - fish:

This aroma is our own development, nowhere you can find on the market, we can not leave out from this series. The aroma is typical and more intense than the sweet versions. We can use it in moody waters.

Liver - fish:

The name also refers, it is a very intense liver fish bolies, we can be successful with it mainly in summer hot waters when nothing works. Thanks for th's intense aroma we can use it in moody waters too.

MISSEL ZADRAVEC CARP BAIT'S WINTER COMPETITION

The Winter Competition boilies family are activating very well in heats up and cold down waters. Everybody knows that in these periods the movement the digestion and the nutrition of carps are slower, it is so difficult to catch them. A big part of flours we changed to well soluble flours in cold water, and we used alcohol based aromas. Their diameter are 16 and 20 mm. This series you can use troughout the year, in moody waters too

MISSEL ZADRAVEC TEAM

PLUM FISH I	MZB0023	16 mm		
ANANAS FISH	MZB0024	16 mm		

Monster Crab:

This product was made with our own aroma, is a very hot smelly aroma. Thanks for this property the carps are detect it from a great distance, in moody waters our best anglers starts fishing with this boilies. At the time of the introduction of this product in 2010, immediately showed what it can, on a water 6 °C, produced a 34,80 kg carp.

Frankfurti Sausage:

We mixed some typical spices in the very well soluble flours, as well became a very good mixture. We added also a Frankfurter sausage aroma, in order to use this boilies in old moody waters too. It is very popular among our customers.

Smoked Sausage:

We mixed some typical spices in the very well soluble flours, as well became a very good mixture. We added also a smoky sausage aroma, in order to use this boilies in old moody waters too troughou, the year.

Strawberry - fish:

In this series was an obligatory tradition to create a product with strawberry aroma. Owe mostly his succes, for more than usual quantity of alcohol-based strawberry aroma. Thanks for it we can be very successful on winter also, the big fishes in winter likes the intense aromas. We tried out some other combinations, and the most successful from them we produced in large quantities.

These products are:

Grapes - fish

Pinaepple - fish

Plum - fish

CARP FANTASY

It is the first boilies from this boilies family. Already in this series the most important aspect was to product them with simmering and not with cooking. With this technique fully preserves their high protein, vitamins, minerals and aroma content. Because the boilies are quickly and easily digested, it enhance the feeling of hunger, and encourage the carps for re-nutrition. For their rich contain in aromas we for shorter fishing trips, with quik results. We have a wide range in this boilies family in two big groups, sweet and smelly, what we can use with succes troughout the year.

OCEAN KILLERS

The name also refers it is a mixture what is composed from predatory fishes, squids and shellfishes flours, mixed with concentrated marine shells flours. Some flours are rapidly solubles in water, for this reason would attract the fishes. Because it very concentrate animal proteins, it will irritate especially the big fishes to ingest the hook. After tests we decide we will sell it in five different versions. The first is the nature version what are contain just the base mixture, but the luring effect of this bait is plenty large enough to attract the fishes like a magnet. At the request of that anglers who are fishing a lot on intense and muddy waters, we have improved this series, with adding aromas what harmonized very well with this mixture. For this product we have a DIP also, which would exclude any scepticism. The mixture composed from lightweight flours, so weight is equal with the balanced boilies. For this reason it's able to attract old big carps at all times, and all waters. The aromatic versions we in moody waters, the nature version in intense angled waters.

ROBIN RED

MISCEL ZADRAVEC
CARP BAIT

In last few years we placed a great emphasis to create spicy boilies, and we marketed in many variations. The boilies with the English pepper can not be lost from our product palette, so we create the Robin Red series. We had already the base mixture, and after experiments we found the component what harmonized perfectly with this mixture. This component is the high purity liver flour and the name of this product is ROBIN RED - LIVER. After our success with this product we performed a lot of experiments, first, we added a natural and very intense attractive was garlic. The result was the ROBIN RED - GARLIC LIVER boilies. Another improvement was the mixing of the Robin Red base mixture with our very successful aroma (Frankfurter sausage), and the result was the ROBIN RED - TNT SPICE. This product have a very intense flavor, we in moody and cold waters. We create a product with chili, black pepper and liver flour, and we named it ROBIN RED - HELLS LIVER. This became a favorite very quickly during the tests. It contains natural components, so we in intense non-moody waters.

MISCEL ZADRAVEC CARP BAIT'S **RED HALIBUT PELLETS**

This product base was given from the know red halibut pellets, which we impregnate with high quality alcoholic flavor under high pressure. the pellet became even more attractive, was successful in cold waters and hot waters too, so we can use it troughout the year. Depending the situation keeps its propertyts during 5-8 hours. We for feeder fishing too.

PELLETS IN DIP

20mm 100g These soaked in dip drilled halibut pellets are the answer to our question, how we can keep a pellet on the hook a longer time without changing there quality. We distribute these 20 mm diameter pellets impregnated in liquid dip in resealable jars. After using we can refill the jars with balls. The dip liquid contains animal proteins, amino acids and vitamne, the impregnated balls in this dip became very attractiv for carps. We can use it troughout the year but it works optimal in cold waters.

We are selling in three types: Liver; Squid&Octopus, Monster Crab.
We are sell in eight types: Liver; Squid&Cctopus, Monster Crab, squid-peach, cctopus-plum, strawberry-fish, pineapple, hells spices

BOILIE HOOK PASTE

Many people are using successful the boilies pastes, so we can not leave out from our range of products. Coating our hook boilies with it, as result we will have a bait with special propertys. First the boilies will work like a soluble boilies, but if we don't catch any fish our hook don't remain without bait. Near the hook gives off an aroma cloud, explaining his luring effect from a great distance. It contains proteins, amino acids, plarty proteins and high quality aromas. We in moody waters competitions for hook boilies tuning troughout the year.

CARP BAIT'S

TAJG

The TAJGs base is a mixture from a lot of plenty and animal protein content flours, amino acids and vitamins. To increase their intensity and to express their action as soon as possible, we added some appealing and fry feeds, because the carps from the fish farmings have met it already. We can use it like base mixture, method mixture, hook paste, soluble and traditional pollies, for feeder fishing and it is a very good material for feeding baits bonding, because without any admixture, up to 30% seedmixture it can strongly stick together. It has a good cloudy effect on the water. This mixture it's a base mixture, we named it TAJG-X. The TAJG series was created with the development of TAJG-X.

TAJG LIVER	MZB0209
TAJG STRAWBERRY	MZB0210

TAJG-MIX:

In this mixture we added in a big part forelli pellets meal, as result we got a high protein and oil contentration smelly mixture. We it mainly for hot waters.

TAJG-FISH:

The big part of this mixture is a very quick soluble, high purity fish flour, with a high content of protein and with smelly aroma. We for troughout the year.

TAJG-SPICE:

In the base mixture we added some special spices, we got an intense spicy mixture. From this „TAJG“ many anglers created a lot of successful boilies. Thanks for this intense aroma we can use it already from the seasons beginning.

TAJG-STRAWBERRY:

The name refers also, this mixture contains strawberry aroma. It has a strawberry-fish character, is not preventing the attention of the carps. It is very good for boilies, it's enough to add some egg, and after cooking already we can use it. It works very well in cold waters too.

TAJG-LIVER:

The name shows that it is a high liver content mixture. Our test anglers used it successful in summer hot waters like hook boilies too.

MONSTER CARP BAITS CLASSIC

The MONSTER CARP CLASSIC it's a high quality product family, was made using just selected natural materials. A special attention was given to the raw materials quality, therefore we used only prominent West European suppliers products. Our product is unique on the market, it's a very important aspect they are made by adding fresh egg and a very important criteria they are made with simmering and not with cooking, in order to keep their high protein, vitamins, aromas and mineral materials content. Because the boilies are quickly and easily digested, it enhance the feeling of hunger, and encourage the carps for re-nutrition.

MONSTER CARP BAIT DIP

If you want the bait on the hook to stand out from the feeding material, when we are fishing in moody waters or when we want increase the amino acid contains of our bolillies, we to use the DIP. When we created this materials the first aspect was the using just first quality natural materials in tune with each other. The liquid admixtures what we used in this product are the fish prcteins, betaine, amino acids and more components what are arouse the interest of carps, thanks for that, using DIP our bait on the hook will not remain intact. We are selling the DIP in eight kinds of flavor, to find the right one for everyone.

MISEL ZADRAVEC FISHING LINE CARP BAIT'S

Thanks for their extra softness, resilience, abrasion resistance and high breaking strengths, the Crusader line is the perfect choice for boilies fishing. It's a light grey line which thanks for his low friction factor allows long jets, and it's very recomand on barfull waters. In the manufacture of this line we kept the highest quality guicelines, and near the most advanced technology we used only first quality materials. We tried to satisfy the highest expectations, the real diameter size identy, the extra scftness, resilience, abrasion resistance and high breaking strengths shows that we have in our hand a quite out cff the common product.
